### Reasons for Allowance

3. Claims 1-24 are allowed.

4. The following is an Examiner's Statement of Reasons for Allowance:

The invention is directed to executing logical drawing commands even with page description languages which do not support logical drawing commands. Both Claims 1 and 9 identifies the uniquely distinct features of "...comparing the held drawing command sequence table with entries in a reference table including registered substitution conditions for drawing commands to determine if there is an entry in the reference table that matches the held drawing command sequence table...""

Kageyama et al. (US 6,025,923) discloses drawing processes and print processes for respective pages performed in accordance with print commands by a plurality of processors.

Schwartz (US 6,891,632) discloses a method and system which analyzes data to be printed, as well as the capabilities, characteristics, and resources available taking into account initial processing performed on a "host" system.

Both references, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

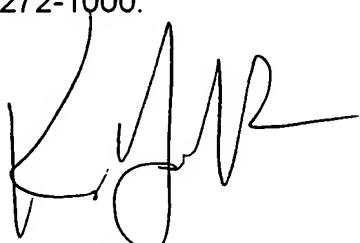

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
